

# ENCHLOR

## MOE Manhole Odor Eliminator

### FEATURES

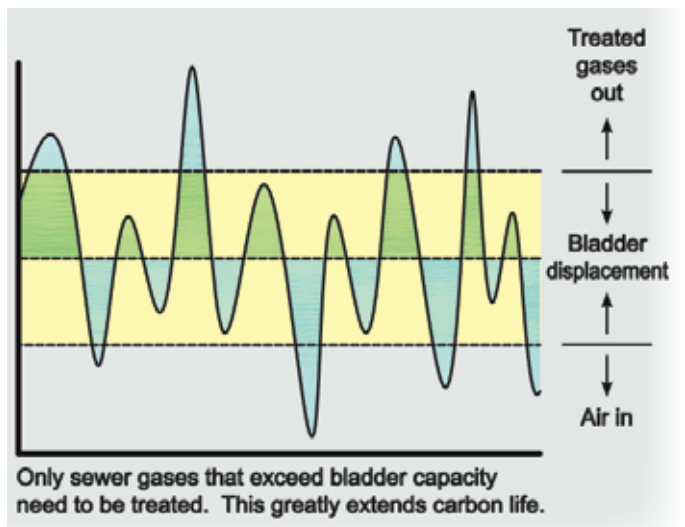

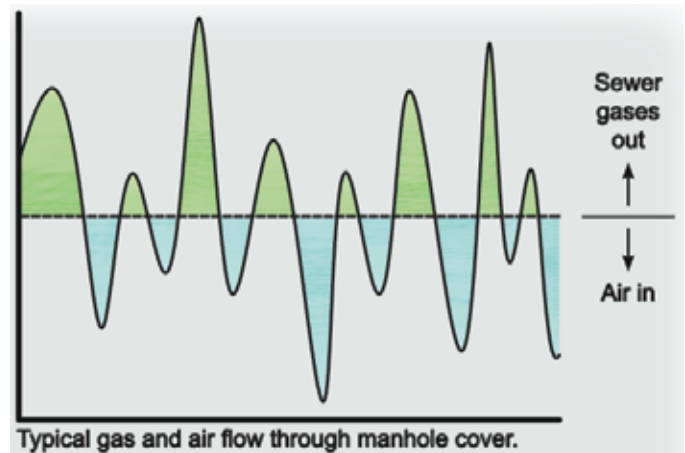

- Controls Odors
- Low Cost
- Easy Installation
- Contains odor absorbent carbon
- Long Lasting
- Replaceable Filter Cartridge
- Low Maintenance
- Fits all size manholes

**Stop the sewer gas  
(rotten egg) smell from  
manholes**

**The bladder buffers the frequent  
fluctuations of sewer gas. The  
odor absorbent carbon only  
has to treat the peak flow rates**

*The manhole odor eliminator is a carbon filter system designed to remove odors from sewer vents and other manholes. Each filter cartridge contains odor absorbent activated carbon. This filter can remove large amounts of hydrogen sulfide and other odors from sewer manholes. Call today for sizing and information.*

# Manhole Odor Eliminator

## Insert Filter

The following information is required for proper installation of the Manhole Odor Eliminator. Indicate whether manhole cover style is 1,2 or 3. Then measure all required dimensions of cover and manhole.

Cover Style \_\_\_\_\_

A: Outside diameter of cover \_\_\_\_\_

B: Drop ring diameter \_\_\_\_\_

(For tapered rings measure largest diameter at top of ring.)

C: Inside diameter of lip \_\_\_\_\_

(For tapered frames measure smallest diameter at base of frame.)

D: Inside diameter of opening \_\_\_\_\_

E: Drop ring depth \_\_\_\_\_

(Does not apply to style 1 covers)

F: Depth of manhole \_\_\_\_\_
